

Environmental Policy

Purpose of this policy

The HealthSure Group Limited is committed to contributing wholly to our industries efforts in minimising the impact of our activities on our environment. We embrace our obligation to perform our operations in a socially responsible way, driving an efficient and lean business model, and committing to ensuring our environmental policies are ingrained in our business. We want to contribute to the establishment of a thriving environment for future generations by actively managing our carbon footprint and investing in carbon offsetting.

Actionable steps toward honouring our commitment

In pursuit of these goals, HealthSure Group commit to;

- 1 Actively exploring ways in which we can completely eliminate environmentally harmful or detrimental processes, changing how we do our business, in a pragmatic and efficient way e.g. remove or limit the need for paper driven processes.
- 2 Minimise waste by evaluating operations and ensuring they are designed to be as lean as possible.
- 3 Minimise toxic emissions through our logistics and supply chain design; including our use of vehicles and/or fleet to support our operations.
- 4 Assess, monitor and limit our power requirements through energy efficient equipment selection; low power consumption lighting; efficient heating and cooling of premises; and considering alternative energy sources where possible.
- 5 Actively promote recycling both internally and also throughout our supply chain.
- 6 Use product ranges which minimise the environmental impact of production and distribution.
- 7 Meet or exceed all the environmental legislation that relates to our operations.
- 8 Implement training programs for our workers, raising awareness of environmental issues and enlisting their support in improving our performance.
- 9 Measure our impact on the environment and set targets for ongoing improvement.
- 10 Use the Woodland Carbon Credit scheme, or any other accredited programme to offset the greenhouse gas emissions generated by our activities, and operate in carbon neutrality.
